The election filed July 15, 2005 has been entered and made of record as paper no. 20050715.

Applicant's election with traverse of claim 1-5 in the reply filed on July 15, 2005 is acknowledged. The traversal is on the ground(s) that "the search and examination for the presently elected Group I (claims 1-5) substantially overlaps with that of the non-elected Group II subject matter directed to a method for forming the device of elected Group I ". This is not found persuasive because the search might overlap but not coextensive. The search of group I does not require to search "a heterojunction bipolar transistor" as recited in Group II.

The requirement is still deemed proper and is therefore made FINAL.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "the first and second crystal layer...forms a heterojunction" is not understood. If the "thin film layer" is formed between (at an interface of the heterojunction) the first and second crystal layer, then there is no "heterojunction" between the first and the second crystal layers; the first and the second crystal layers are separated from each other by the "thin film layer".
